Letter of recommendation for Mr. Mathieu Jay

November 4th, 2025

To whom it may concern,

Having supervised his initial higher education training, I can wholeheartedly recommend Mr. Mathieu Jay for advanced studies and research in software engineering, computer science, informatics and IT.

During his studies, Mathieu always showed motivation, eagerness and candid enthusiasm when presented a new task or field of knowledge. His strong work drive proved a valuable asset for his team members when working on project assignments, and his dedication enabled him to learn fast and thoroughly. He always was among the top 20 % of students, with a very strong grasp of advanced software development concepts, including analysis, modelling, design and specifications. Along with technical and formal skills, he also excels in soft skills including communication and languages. Curious and autonomous, he was part of a selective international group and was chosen for a prestigious internship at DLX, the Design Lab of the University of Tokyo, in which he had impressive results.

As both one of the people who had the privilege of teaching him and the supervisor of grades and tests for his class, I fully expect him to succeed in advanced international studies. Mathieu always envisioned pursuing a Master's degree abroad, and I have full confidence in him.

It is thus my pleasure and privilege to recommend Mr. Mathieu Jay.

Yours sincerely,
Bruno Mery
Contract professor, Département Informatique, IUT de Bordeaux
Director of studies for grades, tests and student success, BUT informatique
